

Course Title

Tridion Sites System Administrator

Learning Objectives:

The course is designed to provide attendees with a high-level architecture overview of Tridion Sites, including some of the key features and concepts.

The course details how to configure Tridion Sites by deploying an environment that utilizes the new Topology Manager and Discovery Service, as well as many of the Content Delivery micro-services. The course also details how to set up DXA for immediate use on the content manager.

The course also explains the fundamentals on how to monitor, troubleshoot, and maintain a typical Tridion Sites 9 installation as well as exploring some key strategies for future-proofing an implementation. Some of the best practices for deploying in the cloud is also explained.

Target Audience:

Users who have never used Tridion Sites before and want to understand how to install and maintain Tridion Sites.

- System Administrators
- Architects
- Developers (optional)

Prerequisites:

Tridion Sites Fundamentals or equivalent experience.
